Abstract for the Book Modelica Conference 2011

Christoph Clauß Kristin Majetta
Fraunhofer Institute for Integrated Circuits IIS, Design Automation Division EAS
Zeunerstraße 38, 01069 Dresden, Germany
{Christoph.Clauss,Kristin.Majetta}@eas.iis.fraunhofer.de

This document is an example of one page abstract for the Modelica Conference 2011. The full conference proceedings are available on a memory stick and on the Web. In addition, a smaller book of abstracts will be given to all participants.

The goal of the book of abstracts is to provide an overview of the papers being presented, so that you can decide if your presentation is worth listening to. Therefore, you can try to make it more attractive and informative. For this purpose, you can also include figures, such as Fig. 1, and a few optional references, such as [1] or [2].

Sample One-Page Abstract for of Abstracts of the Modelica Conference

This document is an example of one page abstract for the Modelica Conference 2011. The full conference proceedings are available on a memory stick and on the Web. In addition, a smaller book of abstracts will be given to all participants.

The goal of the book of abstracts is to provide an overview of the papers being presented, so that you can decide if your presentation is worth listening to. Therefore, you can try to make it more attractive and informative. For this purpose, you can also include figures, such as Fig. 1, and a few optional references, such as [1] or [2].

Please do not exceed these limits, or your PDF will be scaled down slightly for printing. We advise you to use the margins provided on the conference website in order to be uploaded on the conference management system no later than January 17, 2011, and that at least one author should have registered by that time, for the final paper to be included in the conference programme and proceedings.
